

CORRIGENDUM

Correction to Kaminski et al. 2003. True Metabolizable Energy for Wood Ducks from Acorns Compared to Other Waterfowl Foods. *Journal of Wildlife Management* 67:542–550. In the text and Table 2, the Checkett et al. citation should be 2002. The *Wildlife Society Bulletin* volume and page numbers for the Checkett et al. citation in our Literature Cited is correct.

Correction to Aldridge, C. L., and R. M. Brigham. 2002. Sage-grouse Nesting and Brood Habitat Use in Southern Canada. *Journal of Wildlife Management* 66:433–444. In the Abstract (p. 433), the Methods (p. 435, second paragraph), the Dis-

cussion (p. 441, second paragraph), and in the Management Implications (p. 442, first paragraph), we refer to the 7.5-m and 15-m radius plots as patch sizes of 15 m² and 30 m², respectively. These patch sizes are incorrect, and should be 177 m² and 707 m², respectively.

The figure that appears on the cover of the July 2003 issue (Vol. 67, No. 3) contains a mistake. The label on the y-axis of Fig. (A) should read “Max. count from direct observations” rather than “Mean count...” The figure that appears in the text (Gorman et al. 2003:498) is correct.

PLEASE HELP THE JOURNAL OF WILDLIFE MANAGEMENT

The Journal of Wildlife Management (JWM) is a peer-reviewed journal. To efficiently publish *JWM*, we must keep our reviewer database current with the names, contact information, and expertise of wildlife professionals. Please aid us in updating our database by completing this form, mailing it to the address below, or e-mailing us. Thank you for your help —JWM Editorial Staff · jwm-uw@cals.wisc.edu

EXPERTISE

We search for reviewers using key words that correspond to areas of expertise. Please include below or in an e-mail some key words (≤ 10) that could be associated with your name in our database. Consider all aspects of research and management, and focus on areas in which you have extensive knowledge. Some areas to consider: communities, orders, families, and/or species (common names please; e.g., ungulates, grassland birds, wolves), techniques or equipment (e.g., trapping, telemetry, surveys), and any specialized knowledge pertaining to wildlife management and research (e.g., statistics, physiology, ADC, human dimensions, habitat management).

Mail to: *The Journal of Wildlife Management*, Department of Wildlife Ecology, 1630 Linden Drive, University of Wisconsin, Madison, WI 53706.
