

## APPENDIX II-D

### COMPARISON BETWEEN OBSERVED HYDROGRAPHS AND HYDROGRAPHS PREDICTED BY THE GA-KW MODEL

Appendix II-D. Comparison between observed and predicted hydrographs for events used in GA-KW model validation.  $Q_{\text{meas}}(\text{unadj})$  refers to unadjusted measured hydrographs.  $Q_{\text{meas}}(\text{adj})$  refers to measured hydrographs for which the time axis was adjusted to compensate for timing errors in the measurements.

Appendix II-D (cont.).
